

Professional statement outline

Hi I am Mubariz Saeed, I am pursuing my bachelor's degree in Computer Science and will complete my master's degree in Cyber Security at URI. Through my education and involvement in activities like the cyber security club, I have developed strengths in programming languages like C++, Javascript, Python, and SQL. I have also gained hands-on experience in password cracking, network security, and ethical hacking tools like Kali Linux.

My passion for cybersecurity stems from a personal experience where my father was the victim of blackmail through ransomware that significantly impacted his business. I aim to leverage my technical skills and problem-solving abilities to protect organizations and people from cyber threats. My goal is to continuously improve security practices and infrastructure to make the online landscape safer. I find great fulfillment being a part of solutions that positively transform digitally vulnerable environments. Whether through incremental changes or large-scale endeavors, I want to eliminate avenues for cyber attacks to occur.

I hope to apply my skills, values, and vision to support the security objectives of companies, government entities, or organizations aiming to harden their networks and better equip staff against an ever-evolving array of threats. My aim is to problem solve and introduce improvements wherever I have the opportunity.
